

DocuWrite™

Not only supports your documents, it's easy on the back!

DocuWrite supports documents at any angle for easy viewing while you type. It attaches to the tray so it moves with the keyboard, then tilts to a focal angle that is comfortable for you. That's what a document holder does, right? But that's not all this does.

Flip the DocuWrite down over the keys – without tools – and you have a writing surface that lets you take notes while you work at the computer – but without turning, twisting, or stretching over your keyboard to do it.

Positioned on the right side, the writing surface does not obstruct the main keys of a standard size keyboard. So you can type and write while maintaining the same body position. Ingenious!

DocuWrite™ Advantages:

- Mounts between the keyboard tray and arm.
- Unique design flips up to support documents, down to provide a writing surface.
- Document holder features infinite tilt with fingertip adjustment.
- Writing surface is sized to fully support an 8 ½" x 11" sheet of paper.
- Document holder can be moved, without tools, from left to right – or to any of three positions in between.
- Surface can be fully removed when not in use.
- Constructed of durable, powder coated steel and tough phenolic.
- Exceeds the ANSI/BIFMA X5.5, 1998 industry performance standard.
- The stylish and stackable Monitor Riser compliments the DocuWrite by slightly elevating your conventional monitor for better viewing.
