

# EasyMate

Like other split top mechanisms, the EasyMate optimizes the workspace by providing a secondary worksurface that is both height and tilt adjustable. But unlike other split top mechanisms, the EasyMate incorporates Weber Knapp's unique patented technology for height adjustment - allowing a worksurface to be raised by simply lifting up on it and lowered by tipping it slightly and moving it down.

And installation couldn't be easier! Forget about mounting a paddle. Forget about mounting a separate brake package. Forget about carefully routing a cable. Just attach two brackets to the primary surface and two brackets to the secondary surface and you're done. 18 Screws, that's all!

Best of all, while the EasyMate gives you all the functionality of a split top mechanism, it is priced more like a keyboard mechanism.

High end features at a value price!

Company**

# EasyMate

## Advantages:

- Lift-and-Set height adjustment, spring-assisted for effortless adjustment through a range of 12 inches, 6" up and 6" down.
- Soft knob to release +9"/-15" tilt, for comfortable positioning of the hands.
- Simple installation - no paddle, separate brake mechanism, or cable to mount!
- Available in various widths to suit specific workstation dimensions.
- Less intrusive of valuable knee-space area as compared with other split top mechanism.
- Rugged steel construction with textured black powder coat finish.
- Exceeds ANSI/BIFMA x 5.5-1998, for adjustable keyboards with surface size greater than 36" in width.

### SPECIFICATIONS

HEIGHT ADJUSTMENT	
UP	6"
DOWN	6"
TOTAL	12"
HEIGHT ADJUSTMENT	Lift and Set - no paddle, cable or lever
TILT ADJUSTMENT	+9"/-15"
TILT SET BY	Single Knob
SPRING OPTIONS	15 or 20 lb
ANSI/BIFMA X 4.4 1998	Yes (keyboard surfaces greater than 36" in width)
MATERIAL	Steel
FINISH	Textured Black Powder Coat
